

UX DESIGNER

Job Reference: UX-Designer

ABC seeks to recruit a UX Designer to join our Digital Banking Project team. The UX Designer will be responsible for collaborating with product owners and developers to build great products. You will spend time deeply understanding our users' needs, coming up with and testing multiple solutions to their problems and delivering delightful experiences to large, active user-bases. You will work closely with a team of highly talented product managers, designers, researchers and engineers who appreciate user experience and want to build the best products in the market.

Scope of the Job

The jobholder's role is to:

- Develop software concepts and solutions that apply your understanding of user problems, product vision, and technology capabilities
- Create and validate prototypes using a variety of testing methods
- Drive/own product design decisions from beginning to end
- Facilitate design reviews, critiques and workshops
- Use feedback from users and data to help inform your design decisions
- Work closely with the product management team to formulate strategic product direction
- Design across devices and platforms.

Areas of Knowledge / Experience

- 3+ years of experience designing engaging product user experiences
- Demonstrated success in driving design changes that resulted in improved performance on key business levers (e.g., conversion, usage, retention, NPS)
- Experience creating and using design systems
- Experience designing for a broad set of UI platforms like InVision, Ziplin, etc. including web, desktop and mobile
- Passionate about solving user problems and love to experiment
- Have the ability to start with a blank canvas or with constraints
- Thrive in a collaborative cross-functional environment
- Are a top-tier communicator with the ability to inspire/mentor others, give great feedback and facilitate productive workshops
- Could come up with creative solutions to problems
- Are open to learning and creating with new techniques

Portfolios of past work examples are required in order to be considered for candidacy.

Qualifications

- Bachelor's degree in Computer Science, Engineering or a related subject.
