

IOS DEVELOPER

Job Reference: iOS-Dev

ABC seeks to recruit an iOS Developer to join our Digital Banking Project team. The iOS developer will be developing, supporting and maintaining rich, interactive and high performance native mobile applications.

Scope of the Job

The jobholder's role is to:

- Develop high performance iOS apps
- Collaborate with UX Team to design and implement user-driven interfaces for ease of use
- Deliver across the entire app life cycle – concept, design, build, deploy, test, release to app stores and support
- Working directly with developers and product owners to conceptualize, build, test and distribute projects
- Working along other developers to create and maintain a robust framework to support the apps
- Keep up to date on the latest industry trends in the mobile technologies
- Explain technologies and solutions to technical and non-technical stakeholders.

Areas of Knowledge / Experience

- Must have at least 1 year of experience in Apple iOS application development
- Must have experience building native iOS applications for iPad, iPhone and / or both including deployments through the Apple iTunes App Store or Enterprise licensing
- Strong iOS, Objective-C, UI Kit development skills
- Knowledge of security and identity management solutions such as OAuth, certificates, and encryption
- Experience with iOS application performance tuning (e.g. Instruments)
- Experience with REST web services, JSON
- Experience working with QA and testing tools for mobile applications
- Experience with version control software such as Subversion, TFS, or Git
- Experience with OpenGL ES a plus
- Experience with Ruby a plus
- Familiarity with Agile/Scrum development process and continuous integration
- Windows and Macintosh operating systems and Adobe Creative Suite

Qualifications

- Bachelor's Degree in Computer Science or related field preferred.
