

**Arab Banking Corporation (B.S.C.)**  
**CONSOLIDATED FINANCIAL STATEMENTS**  
**31 DECEMBER 2009**

## **INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF ARAB BANKING CORPORATION (B.S.C.)**

We have audited the accompanying consolidated financial statements of Arab Banking Corporation (B.S.C.) [the Bank] and its subsidiaries [the Group] which comprise the consolidated statement of financial position as at 31 December 2009 and the consolidated statements of income, comprehensive income, cash flows and changes in equity for the year then ended, and a summary of significant accounting policies and other explanatory notes.

### **Board of Directors' Responsibility for the Financial Statements**

The Board of Directors is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

### **Auditors' Responsibility**

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate for the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Arab Banking Corporation (B.S.C.)

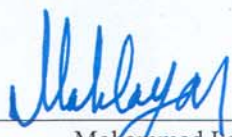

CONSOLIDATED STATEMENT OF FINANCIAL POSITION

## 1 INCORPORATION AND ACTIVITIES

The parent bank, Arab Banking Corporation (B.S.C.), [the Bank] is incorporated in the Kingdom of Bahrain by an Amiri decree and operates under a wholesale banking licence issued by the Central Bank of Bahrain.

The Bank's registered office is at ABC Tower, Diplomatic Area, P.O. Box 5698, Manama, Kingdom of Bahrain. The shares of the Bank are listed on the Bahrain Stock Exchange.

## 2 BASIS OF PREPARATION

These consolidated financial statements are prepared under the historical cost convention, as modified by the measurement at fair value of derivatives, trading and available-for-sale financial assets. In addition, as more fully discussed below, assets and liabilities that are hedged items in fair value hedges, and are otherwise carried at cost, are adjusted to record changes in fair values attributable to the risk being hedged.

The consolidated financial statements have been presented in United States Dollars, rounded to the nearest million unless otherwise stated, which is the functional currency of the Group.

### Statement of compliance

The consolidated financial statements of Arab Banking Corporation (B.S.C.) and its subsidiaries together [the Group] are prepared in accordance with International Financial Reporting Standards [IFRS] issued by the International Accounting Standards Board [IASB] and the relevant provisions of the Bahrain Commercial Companies Law and the Central Bank of Bahrain and Financial Institutions Law.

### Basis of consolidation

The consolidated financial statements comprise the financial statements of the Group as at and for the year ended 31 December each year. The financial statements of the subsidiaries are prepared for the same reporting year as the Bank, using consistent accounting policies. All intra-group balances, transactions, income and expenses and profits and losses resulting from intra-group transactions are eliminated in full.

Subsidiaries are consolidated from the date on which control is transferred to the Group and cease to be consolidated from the date on which control is transferred out of the Group.

Acquisition of non-controlling interests and partial/deemed disposals of subsidiaries are accounted for using the parent entity extension method, whereby:

- a) the difference between the consideration and the book value of the share of net assets is recognised as goodwill;
- b) in the case of partial disposals, the difference between the proceeds received and the book value of the share of net assets sold is recognised as profit or loss in the consolidated statement of income; and
- c) in the case of deemed partial disposals resulting from a capital increase, the difference between the book value of the share of net assets in the subsidiary after and before the capital increase is recognised as profit or loss in the consolidated statement of income.

Non-controlling interests represent the portion of profit or loss and net assets not owned, directly or indirectly, by the Group and are presented separately in the consolidated statement of income and within equity in the consolidated statement of financial position, separately from consolidated equity attributable to the shareholders of the Bank.

### 3 CHANGES IN ACCOUNTING POLICIES

The accounting policies are consistent with those used in the previous year except for the following accounting policies adopted during the year as noted below:

#### *IAS 1 Presentation of Financial Statements (Revised)*

This standard requires an entity to present all owner changes in equity and all non-owner changes to be presented in either in one statement of comprehensive income or in two separate statements of income and comprehensive income. The revised standard also requires that the income tax effect of each component of comprehensive income be disclosed. In addition, it requires entities to present a comparative statement of financial position as at the beginning of the earliest comparative period when the entity has applied an accounting policy retrospectively, makes a retrospective restatement, or reclassifies items in the financial statements.

The Group has elected to present comprehensive income in two separate consolidated statements of income and comprehensive income. Information about the individual components of comprehensive income as well as the tax effects have been disclosed in the notes to the consolidated financial statements. The Group has not provided a restated comparative set of financial position for the earliest comparative period, as it has not adopted any new accounting policy retrospectively, or has made a retrospective restatement, or retrospectively reclassified items in the consolidated financial statements.

#### *IFRS 8 Operating Segments*

This standard requires disclosure of information about the Group's operating segments and replaced the requirement to determine primary (business) and secondary (geographical) reporting segments of the Group. It requires a 'management approach' under which segment information is presented on the same basis as that used for internal reporting purposes. This has resulted in a change to the reportable segments presented. As a result, the operating segments are reported in a manner that is consistent with the internal reporting provided to the senior management and the Board of Directors and are set out in Note 25.

#### *Amendments to IFRS 7 Financial Instruments: Disclosures - Improving Disclosures about Financial*

The amendments to IFRS 7 were issued in March 2009 to enhance fair value and liquidity disclosures. With respect to fair value, the amendments require disclosure of a three-level fair value hierarchy, by class, for all financial instruments recognised at fair value and specific disclosures related to the transfers between levels in the hierarchy and detailed disclosures related to level 3 of the fair value hierarchy. In addition, the amendments modify the required liquidity disclosures with respect to derivative transactions and assets used for liquidity management. Comparative information has not been represented as this is not required by the transition provisions of the amendment

The adoption of these standards and amendments did not have any effect on the financial performance or position of the Group. They did, however, give rise to additional disclosures.

#### *IFRS 9 Financial Instruments*

IFRS 9 was issued in November 2009 and replaces those parts of IAS 39 relating to the classification and measurement of financial assets. The standard is effective for the annual period beginning on or after 1 January 2013. The Group is considering the implications of the standard, the impact on the Group and the timing of its adoption by the Group.

### 4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### **Liquid funds**

Liquid funds comprise of cash, nostro balances and balances with central banks.

#### **Trading securities**

Trading securities are initially recorded at fair value. Gains and losses arising from changes in fair values are included in the consolidated statement of income in the period in which they arise. Interest earned and dividends received are included in interest income and other operating income respectively.

**4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Placements with banks and other financial institutions**

Placements with banks and other financial institutions are stated at amortised cost net of any amounts written off and provision for impairment. The carrying values of such assets which are being effectively hedged for changes in fair value are adjusted to the extent of the changes in fair value being hedged, with the resultant changes being recognised in the consolidated statement of income.

**Non-trading securities**

These are classified as follows:

- Held to maturity
- Available-for-sale
- Other non-trading securities

All non-trading securities are initially recognised at cost, being the fair value of the consideration given including incremental acquisition charges associated with the security.

*Held to maturity*

Securities which have fixed or determinable payments, fixed maturities and are intended to be held to maturity, are subsequently measured at amortised cost, less provision for impairment in value.

*Available-for-sale*

Available-for-sale investments are those which are designated as such or do not qualify to be classified as fair value through profit or loss, held to maturity or loans and advances. They include equity instruments and other debt instruments.

After initial recognition, these are remeasured at fair value, unless fair value cannot be reliably determined in which case they are measured at cost less impairment. That portion of any fair value changes relating to an effective hedging relationship is recognised directly in the consolidated statement of income. Fair value changes which are not part of an effective hedging relationship, are reported under fair value movements during the year in the consolidated statement of comprehensive income until the investment is derecognised or the investment is determined to be impaired. On derecognition or impairment the cumulative gain or loss previously reported as "cumulative changes in fair values" within equity, is included in consolidated statement of income for the year.

*Other non-trading securities*

Other non-trading securities are financial assets with fixed or determinable payments and fixed maturities that are not quoted in the active market. These instruments are not being held with the intent of sale in the near term. These investments are valued at fair value as at 1 July 2008, in accordance with the amendments to IAS 39 'Reclassification of Financial Assets'. Through the effective interest method, the new cost is amortised to the security's expected recoverable amount over the expected remaining life.

**Derecognition of financial assets and financial liabilities**

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where the rights to receive cash flows from the asset have expired, or the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

**4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Loans and advances**

Loans and advances are financial assets with fixed or determinable payments and fixed maturities that are not quoted in an active market. After initial measurement, the loans and advances are subsequently measured at amortised cost using the effective interest rate method, adjusted for effective fair value hedge less any amounts written off and provision for impairment. The losses arising from impairment of such loans and advances are recognised in the consolidated statement of income in 'impairment provisions - net' and in an impairment allowance account in the consolidated statement of financial position. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The amortisation is recognised as 'interest and similar income' in the consolidated statement of income.

In relation to loans and advances which are part of an effective hedging relationship any gain or loss arising from a change in fair value is recognised directly in the consolidated statement of income. The carrying values of loans and advances which are being effectively hedged for changes in fair value are adjusted to the extent of the changes in fair value being hedged.

**Investments in associates**

Investments in associates are accounted for by the equity method. Associates are enterprises in which the Group exercises significant influence but not control, normally where it holds 20% to 50% of the voting power.

**Premises and equipment**

Premises and equipment are stated at cost, less accumulated depreciation and provision for impairment in value, if any.

Freehold land is not depreciated. Depreciation on other premises and equipment is provided on a straight-line basis over their estimated useful lives.

**Impairment and uncollectability of financial assets**

An assessment is made at each statement of financial position date to determine whether there is objective evidence that a specific financial asset or group of financial assets may be impaired. If such evidence exists, an impairment loss is recognised in the consolidated statement of income.

Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and where observable data indicates that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

*Financial assets carried at amortised cost and loans and receivables*

For financial assets carried at amortised cost (such as amounts due from banks, loans and advances as well as held-to-maturity investments), the Group first assesses individually whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an 'impairment provisions - net' and the amount of the loss is recognised in the consolidated statement of income. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of 'interest and similar income'. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Group.

**4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Impairment and uncollectability of financial assets (continued)**

If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the 'impairment provisions - net'. If a future write-off is later recovered, the recovery is credited to the 'impairment provision - net'.

The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate. If the Group has reclassified trading assets to loans and advances, the discount rate for measuring any impairment loss is the new effective interest rate determined at the reclassification date. The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of the Group's internal credit grading system, that considers credit risk characteristics such as asset type, industry, geographical location, collateral type, past-due status and other relevant factors.

Future cash flows on a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. Estimates of changes in future cash flows reflect, and are directionally consistent with, changes in related observable data from year to year (such as changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses in the group and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

*Available-for-sale financial assets*

For available-for-sale financial assets, the Group assesses at each statement of financial position date whether there is an objective evidence that an investment is impaired.

In the case of debt instruments classified as available-for-sale, the Group assesses individually whether there is objective evidence of impairment based on the same criteria as financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that asset previously recognised in the consolidated statement of income. Future interest income is based on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of 'interest and similar income'. If, in a subsequent period, the fair value of a debt instrument increases and the increase can be objectively related to a credit event occurring after the impairment loss was recognised in the consolidated statement of income, the impairment loss is reversed through the consolidated statement of income.

In the case of equity investments classified as available-for-sale, objective evidence would also include a 'significant' or 'prolonged' decline in the fair value of the investment below its cost. Where there is evidence of impairment, the cumulative loss measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in the consolidated statement of income is removed from equity and recognised in the consolidated statement of income. Impairment losses on equity investments are not reversed through the consolidated statement of income. Increases in the fair value after impairment are recognised directly in equity.

**4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Deposits**

All money market and customer deposits are carried at amortised cost. An adjustment is made to these, if part of an effective fair value hedging strategy, to adjust the value of the deposit for the fair value being hedged with the resultant changes being recognised in the consolidated statement of income.

**Repurchase and resale agreements**

Assets sold with a simultaneous commitment to repurchase at a specified future date (repos) are not derecognised. The counterparty liability for amounts received under these agreements are shown as sale of securities under repurchase agreement in the consolidated statement of financial position. The difference between sale and repurchase price is treated as interest expense using effective yield method. Assets purchased with a corresponding commitment to resell at a specified future date (reverse repos) are not recognised in the consolidated statement of financial position, as the Group does not obtain control over the assets. Amounts paid under these agreements are included in placements with banks and other financial institutions or loans and advances, as appropriate. The difference between purchase and resale price is treated as interest income using effective yield method.

**Provisions**

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event and the costs to settle the obligation are both probable and able to be reliably measured.

**Financial guarantees**

In the ordinary course of business, the Group gives financial guarantees, consisting of letters of credit, guarantees and acceptances. Financial guarantees are initially recognised in the consolidated financial statements at fair value, in 'other liabilities', being the premium received. Subsequent to initial recognition, the Group's liability under each guarantee is measured at the higher of the amortised premium and the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee.

Any increase in the liability relating to financial guarantees is taken to the consolidated statement of income in 'impairment provision - net'. The premium received is recognised in the consolidated statement of income in 'other income' on a straight line basis over the life of the guarantee.

**Employee pension and other end of service benefits**

Costs relating to employee pension and other end of service benefits are generally accrued in accordance with actuarial valuations based on prevailing regulations applicable in each location.

**Recognition of income and expenses**

For all financial instruments measured at amortised cost and interest bearing financial instruments classified as available-for-sale, interest income or expense is recorded at the effective interest rate, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate, but not future credit losses. The carrying amount of the financial asset or financial liability is adjusted if the Group revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as interest income or expense. Other fee income and expense are recognised when earned or incurred.

Once the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognised using the original effective interest rate applied to the new carrying amount.

Where the Group enters into an interest rate swap to change interest from fixed to floating (or vice versa) the amount of interest income or expense is adjusted by the net interest on the swap.

**4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Recognition of income and expenses (continued)**

Fees earned for the provision of services over a period of time are accrued over that period. These fees include commission income and asset management, custody and other management and advisory fees. Loan commitment fees for loans that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognised as an adjustment to the effective interest rate on the loan. When it is unlikely that a loan will be drawn down, the loan commitment fees are recognised over the commitment period on a straight line basis.

Fees arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement of the acquisition of shares or other securities are recognised on completion of the underlying transaction. Fees or components of fees that are linked to a certain performance are recognised after fulfilling the corresponding criteria.

**Fair values**

The fair value for financial instruments traded in active markets at the statement of financial position date is based on their quoted market price or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

For all other financial instruments not listed in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models and other relevant valuation models.

For externally managed funds, the fair value is determined by reference to the net asset values provided by the fund administrators.

**Significant accounting judgments and estimates**

**Judgments**

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect in the amounts recognised in the consolidated financial statements:

*Classification of securities*

Upon acquisition of a security, management decides whether it should be classified as held to maturity, held for trading or available-for-sale.

The Group classifies securities investments as trading if they are acquired primarily for the purpose of making short term profit.

Securities which are eligible for reclassification per IAS 39 amendments and the Group has an intention and ability to hold for a foreseeable future are reclassified as other non-trading securities.

Securities which are not held with the intent of sale in the near term and are eligible per IAS 39 amendments are reclassified as other non-trading securities.

**4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Estimation uncertainty**

The key assumptions concerning the future and other key sources of estimation at the statement of financial position date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

*Going concern*

The Bank's management has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Group's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

*Impairment losses on loans and advances*

The Group reviews its individually significant loans and advances at each statement of financial position date to assess whether an impairment loss should be recorded in the consolidated statement of income. In particular, judgment by management is required in the estimation of the amount and timing of future cash flows when determining the impairment loss. In estimating these cash flows, the Group makes judgments about the borrower's financial situation and the net realisable value of collateral. These estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the allowance.

Loans and advances that have been assessed individually and found not to be impaired and all individually insignificant loans and advances are then assessed collectively, in groups of assets with similar risk characteristics, to determine whether provision should be made due to incurred loss events for which there is objective evidence but whose effects are not yet evident. The collective assessment takes account of data from the loan portfolio (such as credit quality, levels of arrears, credit utilisation, loan to collateral ratios etc.), concentrations of risks and economic data (including levels of unemployment, real estate prices indices, country risk and the performance of different individual groups).

The impairment loss on loans and advances is disclosed in more detail in note 9.

*Impairment losses on available-for-sale investments*

The Group reviews its debt securities classified as available-for-sale investments at each statement of financial position date to assess whether they are impaired. This requires similar judgment as applied to the individual assessment of loans and advances.

The internal grading process takes into consideration factors such as collateral held, deterioration in country risk, industry, technological obsolescence as well as identified structural weakness or deterioration in cash flows.

**Taxation on foreign operations**

There is no tax on corporate income in the Kingdom of Bahrain. Taxation on foreign operations is provided for in accordance with the fiscal regulations applicable in each location. No provision is made for any liability that may arise in the event of distribution of the reserves of subsidiaries. A substantial portion of such reserves is required to be retained to meet local regulatory requirements.

**Foreign currencies**

Monetary assets and liabilities in foreign currencies are translated into the Group's functional currency at the rates of exchange ruling at the date of the statement of financial position. Any gains or losses are taken to the consolidated statement of income.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

**4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Foreign currencies (continued)**

The assets and liabilities of foreign operations are translated into the Group's functional currency at rates of exchange ruling at the date of the statement of financial position. Income and expense items are translated at average exchange rates for the period. Foreign exchange translation gains and losses arising from translating the financial statements of the subsidiaries into functional currency, being US dollars, are recorded directly in the consolidated statement of comprehensive income under unrealised gain (loss) on exchange translation in foreign subsidiaries.

**Trade and settlement date accounting**

All "regular way" purchases and sales of financial assets are recognised on the trade date, i.e. the date that the Group commits to purchase or sell the asset.

**Derivatives and hedge accounting**

The Group enters into derivative instruments including forwards, futures, forward rate agreements, swaps and options in the foreign exchange, interest rate and capital markets. These are stated at fair value. Derivatives with positive market values (unrealised gains) are included in other assets and derivatives with negative market values (unrealised losses) are included in other liabilities in the consolidated statement of financial position.

Changes in the fair values of derivatives held for trading activities or to offset other trading positions or do not qualify for hedge accounting are included in other operating income in the consolidated statement of income.

For the purposes of hedge accounting, hedges are classified into three categories: (a) fair value hedges which hedge the exposure to changes in the fair value of a recognised asset or liability; (b) cash flow hedges which hedge the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability or a forecasted transaction; and (c) net investment hedges which hedge the exposure to net investment in foreign operation.

Changes in the fair value of derivatives that are designated, and qualify, as fair value hedges and that prove to be highly effective in relation to the hedged risk, are included in other operating income along with the corresponding changes in the fair value of the hedged assets or liabilities which are attributable to the risk being hedged.

Changes in the fair value of derivatives that are designated, and qualify, as cash flow hedges and that prove to be highly effective in relation to the hedged risk are recognised in the statement of comprehensive income and the ineffective portion recognised in the consolidated statement of income. The gains or losses on cash flow hedges recognised initially in equity are transferred to the consolidated statement of income in the period in which the hedged transaction impacts the income. Where the hedged transaction results in the recognition of an asset or a liability the associated gain or loss that had been initially recognised in equity is included in the initial measurement of the cost of the related asset or liability.

Change in fair value of derivative or non-derivatives that are designated and qualify, as net investment hedges and that prove to be highly effective in relation to the hedged risk are accounted for in a way similar to cash flow hedges.

Hedge accounting is discontinued when the derivative hedging instrument either expires or is sold, terminated or exercised, no longer qualifies for hedge accounting or is revoked. Upon such discontinuance:

- in the case of fair value hedges of interest-bearing financial instruments any adjustment to the carrying amount relating to the hedged risk is amortised in the consolidated statement of income over the remaining term to maturity.
- in the case of cash flow hedges, any cumulative gain or loss on the hedging instrument recognised in equity is retained in equity until the forecasted transaction occurs. When such transaction occurs the gain or loss retained in equity is recognised in the consolidated statement of income or included in the initial measurement of the cost of the related asset or liability, as appropriate. Where the hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in equity is transferred to the consolidated statement of income.

31 December 2009

**4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Derivatives and hedge accounting (continued)**

Certain derivatives embedded in other financial instruments are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not carried at fair value through the consolidated statement of income. These embedded derivatives are measured at fair value with the changes in fair value recognised in the consolidated statement of income.

**Fiduciary assets**

Assets held in trust or in a fiduciary capacity are not treated as assets of the Group and, accordingly, are not included in the consolidated statement of financial position.

**Offsetting**

Financial assets and financial liabilities are only offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and the Group intends to settle on a net basis, or to realise the asset and settle the liability simultaneously. This is not generally the case with the master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

**Term notes, bonds and other term financing**

Issued financial instruments (or their components) are classified as liabilities under 'Term notes, bonds and other term financing', where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder.

After initial measurement, the term notes, bonds and other term financing are subsequently measured at amortised cost using the effective interest rate method. Amortised cost is calculated by taking into account any discount or premium on the issue and costs that are an integral part of the effective interest rate.

**5 CLASSIFICATION OF FINANCIAL INSTRUMENTS**

As at 31 December 2009, financial instruments have been classified for the purpose of measurement under International Accounting Standard 39 *Financial Instruments: Recognition and Measurement* as follows:

	<i>Held for trading</i>	<i>Available-for-sale</i>	<i>Amortised cost/ Loans and receivables</i>	<i>Total</i>
<b>ASSETS</b>				
Liquid funds	-	-	646	646
Trading securities	135	-	-	135
Placements with banks and other financial institutions	-	-	3,949	3,949
Non-trading securities *	-	5,632	3,920	9,552
Loans and advances	-	89	10,860	10,949
Interest receivable and other assets	-	-	590	590
	<b>135</b>	<b>5,721</b>	<b>19,965</b>	<b>25,821</b>
	<i>Held for trading</i>	<i>Available-for-sale</i>	<i>Amortised cost</i>	<i>Total</i>
<b>LIABILITIES</b>				
Deposits from customers	-	-	9,909	9,909
Deposits from banks and other financial institutions	-	-	6,224	6,224
Certificates of deposit	-	-	34	34
Securities sold under repurchase agreements	-	-	4,079	4,079
Interest payable, taxation and other liabilities	-	-	794	794
TERM NOTES, BONDS AND OTHER TERM FINANCING	-	-	2,344	2,344
	<b>-</b>	<b>-</b>	<b>23,384</b>	<b>23,384</b>

\*Included in the above are other non-trading securities amounting to US\$ 3,903 million (2008: US\$ 4,087 million) which were reclassified, effective 1 July 2008. Refer note 8 for details.

**5 CLASSIFICATION OF FINANCIAL INSTRUMENTS (continued)**

As at 31 December 2008, financial instruments have been classified for the purpose of measurement under International Accounting Standard 39 *Financial Instruments: Recognition and Measurement* as follows:

	<i>Held for trading</i>	<i>Available-for-sale</i>	<i>Amortised cost/ Loans and receivables</i>	<i>Total</i>
<b>ASSETS</b>				
Liquid funds	-	-	823	823
Trading securities	126	-	-	126
Placements with banks and other financial institutions	-	-	4,017	4,017
Non-trading securities*	-	6,504	4,119	10,623
Loans and advances	-	105	11,826	11,931
Interest receivable and other assets	-	-	847	847
	<u>126</u>	<u>6,609</u>	<u>21,632</u>	<u>28,367</u>
	<i>Held for trading</i>	<i>Available-for-sale</i>	<i>Amortised cost</i>	<i>Total</i>
<b>LIABILITIES</b>				
Deposits from customers	-	-	10,728	10,728
Deposits from banks and other financial institutions	-	-	6,210	6,210
Certificates of deposit	-	-	38	38
Securities sold under repurchase agreements	-	-	5,814	5,814
Interest payable, taxation and other liabilities	-	-	1,110	1,110
<b>TERM NOTES, BONDS AND OTHER</b>				
TERM FINANCING	-	-	2,498	2,498
	<u>-</u>	<u>-</u>	<u>26,398</u>	<u>26,398</u>

\*Included in the above are other non-trading securities amounting to US\$ 3,903 million (2008: US\$ 4,087 million) which were reclassified, effective 1 July 2008. Refer note 8 for details.

**6 TRADING SECURITIES**

	<b>2009</b>	<b>2008</b>
Externally managed funds	<b>6</b>	31
Debt securities	<b>129</b>	81
Equities	-	14
	<b>135</b>	126

Externally managed funds represent investments in hedge funds (fund of funds) managed by internationally renowned asset managers. In 2007, the Group gave notice to the fund managers of the externally managed funds to exit the funds.

**7 NON-TRADING SECURITIES**

	<b>2009</b>			<b>2008</b>		
	<i>Quoted</i>	<i>Unquoted</i>	<i>Total</i>	<i>Quoted</i>	<i>Unquoted</i>	<i>Total</i>
<b>Available-for-sale</b>						
Debt securities	<b>5,675</b>	<b>400</b>	<b>6,075</b>	6,585	991	7,576
Equity securities *	<b>34</b>	<b>79</b>	<b>113</b>	25	81	106
<b>Held to maturity</b>						
Debt securities	-	<b>17</b>	<b>17</b>	-	32	32
<b>Other non-trading securities carried at amortised cost **</b>	<b>3,903</b>	-	<b>3,903</b>	4,087	-	4,087
	<b>9,612</b>	<b>496</b>	<b>10,108</b>	10,697	1,104	11,801
Provision against non-trading securities	<b>(146)</b>	<b>(410)</b>	<b>(556)</b>	(161)	(1,017)	(1,178)
	<b>9,466</b>	<b>86</b>	<b>9,552</b>	10,536	87	10,623

\* Includes unquoted equity securities of US\$ 55 million (2008: US\$ 55 million) carried at cost. This is due to the unpredictable nature of future cash flows and lack of suitable alternative methods to arrive at a reliable fair value. There is no market for these investments and the Group intends to hold them for the long term.

All other available-for-sale securities and other non-trading securities have been valued using observable market inputs.

\*\*As explained in note 8, the Group has identified assets, eligible under the amendment to IAS 39, for which it has a clear intent to hold for the foreseeable future and are no longer quoted in an active market. The assets were reclassified with retrospective effect as on 1 July 2008 in accordance with the amendment to IAS 39 and are reflected as other non-trading securities carried at amortised cost.

Provisions against non-trading securities are primarily on collateralized debt obligations and for failed banks on account of market dislocations, mainly in North America and Europe.

**7 NON-TRADING SECURITIES (continued)**

The ratings distribution of non-trading securities is given below:

	<b>2009</b>	<b>2008</b>
AAA rated debt securities	4,727	5,826
AA to A rated debt securities	2,671	3,253
Other investment grade debt securities	1,198	687
Other non-investment grade debt securities	944	1,620
Unrated debt securities	455	309
Equity securities	113	106
	<b>10,108</b>	<b>11,801</b>
Provisions against non-trading securities	<b>(556)</b>	<b>(1,178)</b>
	<b>9,552</b>	<b>10,623</b>

The movements in provisions against non-trading securities during the year were as follows:

	<b>2009</b>	<b>2008</b>
At 1 January	1,178	318
Charge for the year	17	899
Write backs / recoveries	(23)	-
Write-offs	(610)	(28)
Foreign exchange translation and other adjustments	(6)	(11)
At 31 December	<b>556</b>	<b>1,178</b>

Gross amount of non-trading securities individually determined to be impaired before deducting any individually assessed impairment losses was US\$ 608 million (2008: US\$ 1,254 million). Interest income received during the year on impaired securities was US\$ 6 million (2008: US\$ 9 million).

**8 RECLASSIFICATION OF FINANCIAL ASSETS**

In October 2008, the IASB issued amendments to IAS 39 "Financial Instruments: Recognition and Measurement" and IFRS 7 "Financial Instruments: Disclosures" titled "Reclassification of Financial Assets". The amendments to IAS 39 permit reclassification of financial assets from the available-for-sale category to the other non-trading securities category in certain circumstances.

The amendments to IFRS 7 introduce additional disclosure requirements if an entity has reclassified financial assets in accordance with the IAS 39 amendments. The amendments were effective retrospectively to 1 July 2008.

Per the amendments to IAS 39 and IFRS 7, "Reclassification of Financial Assets", the Group reclassified certain available-for-sale securities assets to other non-trading securities carried at amortised cost. The Group identified assets, eligible under the amendments, for which it had a clear intent to hold for the foreseeable future. The assets were reclassified with retrospective effect as on 1 July 2008. The significant market dislocations witnessed in the financial sector in 2008 is considered as a rare event.

The carrying values and fair values of the assets reclassified are as follows:

	<b>2009</b>	<b>2008</b>
Carrying value	3,903	4,087
Fair value	3,751	3,662

Fair value gains that would have been recognised in other comprehensive income for the year ended 31 December 2009 had the other non-trading securities not been reclassified amounts to US\$ 273 million (2008: loss of US\$ 425 million).

**8 RECLASSIFICATION OF FINANCIAL ASSETS (continued)**

The Group earns an effective interest rate of 1% to 8% (2008: 1% to 9%) on these investments and the carrying values reflect the cash flows expected to be recovered as of year end. Reclassified available-for-sale financial assets at cost include US\$ 276 million (2008: US\$ 316 million) which have been hedged for changes in fair value, on account of change in interest rates.

**9 LOANS AND ADVANCES**

	<i>2009</i>	<i>2008</i>
<i>i) By industrial sector</i>		
Financial services	2,239	3,828
Other services	3,108	3,052
Manufacturing	3,702	2,990
Construction	624	660
Mining and quarrying	456	283
Personal	309	468
Trade	306	472
Agriculture, fishing and forestry	299	148
Consumer	221	192
Government	216	265
	<u>11,480</u>	<u>12,358</u>
Loan loss provisions	(531)	(427)
	<u><u>10,949</u></u>	<u><u>11,931</u></u>

	<i>2009</i>	<i>2008</i>
<i>ii) Loan loss provisions by industrial sector</i>		
Financial services	154	93
Other services	23	17
Manufacturing	70	47
Construction	2	3
Personal	2	3
Trade	42	32
Agriculture, fishing and forestry	2	3
Consumer	7	5
Government	63	62
Collective impairment	166	162
	<u>531</u>	<u>427</u>

The movements in loan loss provisions during the year were as follows:

	<i>Specific impairment 2009</i>	<i>Specific impairment 2008</i>	<i>Collective impairment 2009</i>	<i>Collective impairment 2008</i>
At 1 January	265	206	162	113
Charge for the year	127	116	4	51
Write backs / recoveries	(10)	(10)	-	(1)
Write-offs	(29)	(21)	-	-
Foreign exchange translation and other adjustments	12	(26)	-	(1)
At 31 December	<u>365</u>	<u>265</u>	<u>166</u>	<u>162</u>

The gross amount of loans, individually determined to be impaired before deducting any individually assessed impairment allowance amounted to US\$ 405 million (2008: US\$ 235 million).

**9 LOANS AND ADVANCES (continued)**

The fair value of tangible collateral that the Group holds relating to loans individually determined to be impaired at 31 December 2009 amounts to US\$ 20 million (2008: US\$ 25 million).

At 31 December 2009, interest in suspense on past due loans amounted to US\$ 205 million (2008: US\$ 194 million).

**10 IMPAIRMENT PROVISIONS - NET**

During the year the Group has made the following provisions for impairment - net:

	<b>2009</b>	<b>2008</b>
Non-trading securities (note 7)	<b>6</b>	(899)
Loans and advances (note 9)	<b>(121)</b>	(156)
	<b>(115)</b>	(1,055)

**11 OTHER ASSETS**

	<b>2009</b>	<b>2008</b>
Positive fair value of derivatives (note 20)	<b>94</b>	244
Margin dealing accounts	<b>76</b>	51
Bank owned life insurance	<b>29</b>	28
Staff loans	<b>22</b>	23
Investments in associates	<b>21</b>	5
Assets acquired on debt settlement	<b>9</b>	15
Securities sold awaiting value	<b>5</b>	55
Others	<b>174</b>	175
	<b>430</b>	596

The negative fair value of derivatives amounting to US\$ 122 million (2008: US\$ 299 million) is included in other liabilities (note 13). Details of derivatives are given in note 20.

**12 TAXATION ON FOREIGN OPERATIONS**

	<b>2009</b>	<b>2008</b>
<b>Consolidated statement of financial position</b>		
Current tax liability	<b>102</b>	28
Deferred tax liability	<b>14</b>	3
	<b>116</b>	31
<b>Consolidated statement of income</b>		
Current tax on foreign operations	<b>50</b>	53
Deferred tax on foreign operations	<b>(4)</b>	(17)
	<b>46</b>	36
<b>Analysis of tax charge</b>		
At Bahrain (income tax rate of nil)	-	-
On profits of subsidiaries operating in other jurisdictions	<b>46</b>	36
Income tax expense reported in the consolidated statement of income	<b>46</b>	36

In view of the operations of the Group being subject to various tax jurisdictions and regulations, it is not practical to provide a reconciliation between the accounting and taxable profits together with the details of the effective tax rates.

**13 OTHER LIABILITIES**

	<b>2009</b>	<b>2008</b>
Negative fair value of derivatives (note 20)	122	299
Margin deposits including cash collateral	60	73
Cash export and credit assignment payables	58	131
Employee related payables	54	58
Deferred income	21	19
Cheques for collection	18	30
Non-corporate tax payable	8	9
Accrued charges and other payables	198	247
	<b>539</b>	<b>866</b>

The positive fair value of derivatives amounting to US\$ 94 million (2008: US\$ 244 million) is included in other assets (note 11). Details of derivatives are given in note 20.

**14 TERM NOTES, BONDS AND OTHER TERM FINANCING**

In the ordinary course of business, the Bank and certain subsidiaries raise term financing through various capital markets at commercial rates.

**Total obligations outstanding at 31 December 2009**

	<i>Parent bank</i>	<i>Subsidiaries</i>	<i>Total</i>
<b>Aggregate maturities</b>			
2010	384	-	384
2011	292	200	492
2012	1,000	-	1,000
2014	56	-	56
2017	412	-	412
	<b>2,144</b>	<b>200</b>	<b>2,344</b>
Total obligations outstanding at 31 December 2008	2,239	259	2,498

All obligations bear floating rates of interest.

During the year, the Bank repurchased a portion of its subordinated liabilities with a nominal value of US\$ 88 million (2008: nil). The resultant net gain on the repurchase amounting to US\$ 34 million (2008: Nil) is included as a part of "other operating income" in the consolidated statement of income (note 18).

**15 EQUITY**

**a) Share capital**

	<b>2009</b>	<b>2008</b>
Authorised – 2,500 million shares of US\$ 1 each (2008: 2,500 million shares of US\$ 1 each)	<b>2,500</b>	2,500
Issued, subscribed and fully paid – 2,000 million shares of US\$ 1 each (2008: 2,000 million shares of US\$ 1 each)	<b>2,000</b>	2,000

**15 EQUITY (continued)**

**Rights issue**

The Board of Directors at its meeting held on 23 December 2009 resolved to convene an Extraordinary General Meeting to increase the authorised, issued and paid up share capital of the Bank from US\$ 2,000 million to US\$ 3,110 million by way of a priority rights offer to existing shareholders. This is subject to approval of the shareholders at an Extraordinary General Meeting to be held on 28 January 2010.

The Board of Directors at its meeting held on 25 March 2008 resolved to increase the authorised, issued and paid up capital of the Bank. The authorised share capital of the Bank was increased from US\$ 1,500 million to US\$ 2,500 million and the issued share capital from US\$ 1,000 million to US\$ 2,000 million through a priority rights offering of 1,000 million shares (nominal value US\$ 1 per share) to existing shareholders. These shares were issued at a premium of US\$ 0.11 per share and the allotment was completed on 18 June 2008.

The Board of Directors has not recommended a dividend relating to the year ended 31 December 2009 (2008: Nil).

**b) Statutory reserve**

As required by the Articles of Association of the Bank and the Bahrain Commercial Companies Law, 10% of the profit for the year is transferred to the statutory reserve. Such annual transfers will cease when the reserve totals 50% of the paid up share capital. No transfer was made in the previous year on account of the loss incurred. The reserve is not available except in such circumstances as stipulated in the Bahrain Commercial Companies Law and following the approval of the Central Bank of Bahrain.

**c) General reserve**

The general reserve underlines the shareholders' commitment to enhance the strong equity base of the Bank. There are no restrictions on the distribution of this reserve after obtaining CBB approval.

**d) Cumulative changes in fair values**

	<i>2009</i>	<i>2008</i>
At 1 January	<b>(434)</b>	(241)
Transferred to consolidated statement of income on impairment	<b>11</b>	171
Transferred to consolidated statement of income on disposal	-	2
Net movement in fair value during the year	<b>170</b>	(392)
Amortisation of fair value short-fall on reclassified securities	<b>30</b>	26
At 31 December	<b>(223)</b>	(434)

**16 INTEREST AND SIMILAR INCOME**

	<i>2009</i>	<i>2008</i>
Loans and advances	<b>794</b>	1,083
Securities	<b>233</b>	502
Placements with banks and other financial institutions	<b>59</b>	200
Others	<b>19</b>	31
	<b>1,105</b>	1,816

**17 INTEREST AND SIMILAR EXPENSE**

	<b>2009</b>	<b>2008</b>
Deposits from banks and other financial institutions	<b>482</b>	934
Deposits from customers	<b>174</b>	314
Term notes, bonds and other term financing	<b>52</b>	119
Others	<b>5</b>	1
Certificates of deposit	<b>1</b>	17
	<b>714</b>	1,385

**18 OTHER OPERATING INCOME**

	<b>2009</b>	<b>2008</b>
Fee and commission income	<b>187</b>	192
Fee and commission expense	<b>(30)</b>	(50)
Losses on non-trading securities - net	-	(20)
Gains on dealing in foreign currencies - net	<b>20</b>	26
Gains on dealing in derivatives - net	<b>9</b>	17
Gains (losses) on trading securities - net	<b>1</b>	(32)
Gain on repurchase of subordinated debt (note 14)	<b>34</b>	-

	<b>250</b>	176

Included in the fee and commission income is US\$ 12 million (2008: US\$ 11 million) is fee income relating to trust and other fiduciary activities.

**19 SUBSIDIARIES**

The principal subsidiaries, all of which have 31 December as their year end, are as follows:

	<i>Country of incorporation</i>	<i>Interest % of Arab Banking Corporation (B.S.C.)</i>	
		<b>2009</b>	<b>2008</b>
ABC International Bank plc	United Kingdom	<b>100</b>	100
ABC Islamic Bank (E.C.)	Bahrain	<b>100</b>	100
Arab Banking Corporation (ABC) - Jordan	Jordan	<b>87</b>	87
Banco ABC Brasil S.A.	Brazil	<b>56</b>	56
ABC Algeria *	Algeria	<b>88</b>	70
Arab Banking Corporation - Egypt [S.A.E.]	Egypt	<b>98</b>	98
ABC Tunisie	Tunisia	<b>100</b>	100
Arab Financial Services Company B.S.C. (c)**	Bahrain	<b>55</b>	55

\* During the year, the Group increased its shareholding in ABC Algeria to 87.62% from 70% held previously through participation in a rights issue.

\*\* In May 2008, the Group increased its shareholding in Arab Financial Services Company B.S.C. (c) [AFS] to 54.6% from 45.7% held previously, resulting in the Group acquiring a controlling interest in AFS at book value.

The financial statements of AFS have been consolidated in the financial statements of the Group from the date control was transferred to the Group.

**20 DERIVATIVES AND HEDGING**

In the ordinary course of business the Group enters into various types of transactions that involve derivative financial instruments.

The table below shows the positive and negative fair values of derivative financial instruments. The notional amount is that of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at year end and are not indicative of either market or credit risk.

	2009			2008		
	Positive fair value	Negative fair value	Notional amount	Positive fair value	Negative fair value	Notional amount
<i>Derivatives held for trading</i>						
Interest rate swaps	65	62	1,475	120	95	2,692
Currency swaps	1	-	14	21	5	165
Forward foreign exchange contracts	7	6	3,144	39	13	2,907
Options	21	24	3,053	37	69	2,647
Futures	-	-	1,714	26	73	2,507
	<b>94</b>	<b>92</b>	<b>9,400</b>	<b>243</b>	<b>255</b>	<b>10,918</b>
<i>Derivatives held as hedges</i>						
Interest rate swaps	-	29	514	1	42	913
Currency swaps	-	1	26	-	2	27
Forward foreign exchange contracts	-	-	44	-	-	491
Options	-	-	-	-	-	1,500
	<b>-</b>	<b>30</b>	<b>584</b>	<b>1</b>	<b>44</b>	<b>2,931</b>
	<b>94</b>	<b>122</b>	<b>9,984</b>	<b>244</b>	<b>299</b>	<b>13,849</b>
Risk weighted equivalents (credit and market risk)			<b>1,596</b>			<b>1,006</b>

Derivatives are carried at fair value using valuation techniques based on observable market inputs.

Derivatives held as hedges include:

- a) Fair value hedges which are predominantly used to hedge fair value changes arising from interest rate fluctuations in loans and advances, placements, deposits and available-for-sale debt securities.

For the year ended 31 December 2009, the Group recognised a net gain of US\$ 12 million (2008: loss of US\$ 53 million), on hedging instruments. The total loss on hedged items attributable to the hedged risk amounted to US\$ 13 million. (2008: gain of US\$ 55 million).

- b) Net investment hedges comprise forward foreign exchange contracts of US\$ 15 million (2008: US\$ 256 million). As at 31 December 2009, the fair value of the forward foreign exchange contracts was immaterial.

In addition to the forward foreign exchange contracts, the Group uses deposits which are accounted for as hedges of net investment in foreign operations. As at 31 December 2009, the Group had deposits amounting to US\$ 298 million (2008: US\$ 202 million) which were designated as net investment hedges.

***Derivative product types***

Forwards and futures are contractual agreements to either buy or sell a specified currency, commodity or financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the over-the-counter market. Foreign currency and interest rate futures are transacted in standardised amounts on regulated exchanges and are subject to daily cash margin requirements. Forward rate agreements are effectively tailor-made interest rate futures which fix a forward rate of interest on a notional loan, for an agreed period of time starting on a specified future date.

**20 DERIVATIVES AND HEDGING (continued)**

***Derivative product types (continued)***

Swaps are contractual agreements between two parties to exchange interest or foreign currency amounts based on a specific notional amount. For interest rate swaps, counterparties generally exchange fixed and floating rate interest payments based on a notional value in a single currency. For cross-currency swaps, notional amounts are exchanged in different currencies. For cross-currency interest rate swaps, notional amounts and fixed and floating interest payments are exchanged in different currencies.

Options are contractual agreements that convey the right, but not the obligation, to either buy or sell a specific amount of a commodity or financial instrument at a fixed price, either at a fixed future date or at any time within a specified period.

***Derivative related credit risk***

Credit risk in respect of derivative financial instruments arises from the potential for a counterparty to default on its contractual obligations and is limited to the positive fair value of instruments that are favorable to the Group. The majority of the Group's derivative contracts are entered into with other financial institutions and there is no significant concentration of credit risk in respect of contracts with positive fair value with any individual counterparty at the date of the statement of financial position.

***Derivatives held or issued for trading purposes***

Most of the Group's derivative trading activities relate to sales, positioning and arbitrage. Sales activities involve offering products to customers. Positioning involves managing market risk positions with the expectation of profiting from favorable movements in prices, rates or indices. Arbitrage involves identifying and profiting from price differentials between markets or products. Also included under this heading are any derivatives which do not meet IAS 39 hedging requirements.

***Derivatives held or issued for hedging purposes***

The Group has adopted a comprehensive system for the measurement and management of risk. Part of the risk management process involves managing the Group's exposure to fluctuations in foreign exchange rates (currency risk) and interest rates through asset and liability management activities. It is the Group's policy to reduce its exposure to currency and interest rate risks to acceptable levels as determined by the Board of Directors. The Board has established levels of currency risk by setting limits on currency position exposures. Positions are monitored on an ongoing basis and hedging strategies used to ensure positions are maintained within established limits. The Board has established levels of interest rate risk by setting limits on the interest rate gaps for stipulated periods. Interest rate gaps are reviewed on an ongoing basis and hedging strategies used to reduce the interest rate gaps to within the limits established by the Board of Directors.

As part of its asset and liability management the Group uses derivatives for hedging purposes in order to reduce its exposure to currency and interest rate risks. This is achieved by hedging specific financial instruments, forecasted transactions as well as strategic hedging against overall statement of financial position exposures. For interest rate risk this is carried out by monitoring the duration of assets and liabilities using simulations to estimate the level of interest rate risk and entering into interest rate swaps and futures to hedge a proportion of the interest rate exposure, where appropriate. Since strategic hedging does not qualify for special hedge accounting related derivatives are accounted for as trading instruments.

The Group uses forward foreign exchange contracts and currency swaps to hedge against specifically identified currency risks. In addition, the Group uses interest rate swaps and interest rate futures to hedge against the interest rate risk arising from specifically identified loans and securities bearing fixed interest rates. In all such cases the hedging relationship and objective, including details of the hedged item and hedging instrument, are formally documented and the transactions are accounted for as hedges.

**21 CREDIT COMMITMENTS AND CONTINGENT ITEMS**

Credit commitments and contingent items include commitments to extend credit, standby letters of credit, acceptances and guarantees, which are structured to meet the various requirements of customers.

At the statement of financial position date, the principal outstanding and the risk weighted equivalents were as follows:

	<i>2009</i>	<i>2008</i>
Short-term self-liquidating trade and transaction-related contingent items	<b>5,987</b>	6,036
Direct credit substitutes, guarantees and acceptances	<b>1,913</b>	1,351
Undrawn loans and other commitments	<b>894</b>	1,401
	<b>8,794</b>	8,788
Risk weighted equivalents	<b>2,725</b>	3,321

The table below shows the contractual expiry by maturity of the Group's credit commitments and contingent items:

	<i>2009</i>	<i>2008</i>
On demand	<b>937</b>	1,478
1 - 6 months	<b>2,701</b>	1,867
6 - 12 months	<b>2,107</b>	1,666
1 - 5 years	<b>2,813</b>	3,352
Over 5 years	<b>236</b>	425
	<b>8,794</b>	8,788

The Group expects that not all of the contingent liabilities or commitments will be drawn before expiry of the commitments.

The Group is engaged in litigation in various jurisdictions. The litigation involves claims by and against the Group which have arisen in the ordinary course of business. The Directors of the Bank, after reviewing the claims pending against Group companies and based on the advice of relevant professional legal advisors, are satisfied that the outcome of these claims will not have a material adverse effect on the financial position of the Group.

**22 SIGNIFICANT NET FOREIGN CURRENCY EXPOSURES**

Significant net foreign currency exposures, arising mainly from investments in subsidiaries, are as follows:

	<i>2009</i>		<i>2008</i>	
	<i>Currency</i>	<i>US\$ equivalent</i>	<i>Currency</i>	<i>US\$ equivalent</i>
<b>Long (short)</b>				
Brazilian Real	<b>663</b>	<b>377</b>	64	27
Egyptian Pound	<b>808</b>	<b>147</b>	640	116
Jordanian Dinar	<b>85</b>	<b>120</b>	78	110
Pound Sterling	<b>107</b>	<b>174</b>	29	42
Algerian Dinar	<b>9,331</b>	<b>130</b>	2,911	41
Saudi Riyal	<b>4</b>	<b>1</b>	59	16
UAE Dirham	<b>1,292</b>	<b>352</b>	-	-

The UAE Dirham exposure arising from net trading position is entirely covered by currency options to minimise the risk of loss from adverse movements in the foreign currency rates.

**23 FAIR VALUE OF FINANCIAL INSTRUMENTS**

Fair value is an amount for which an asset could be exchanged or a liability settled between knowledgeable and willing parties in an arm's length transaction. Consequently, differences can arise between carrying values and fair value estimates.

The fair values of financial assets and financial liabilities which are not carried at fair value are not materially different from their carrying value except for the following:

	2009		2008	
	Carrying value	Fair value	Carrying value	Fair value
Other non-trading securities	3,903	3,751	4,087	3,662
Term notes, bonds and other term financing	1,089	932	1,184	809

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

**Level 1 valuation:** Directly observable quotes for the same instrument (market prices).

**Level 2 valuation:** Directly observable proxies for the same instrument accessible at valuation date (mark-to-model with market data).

**Level 3 valuation:** Derived proxies (interpolation of proxies) for similar instruments that have not been observed (mark-to-model with deducted proxies).

As at 31 December 2009 the Group has used the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

	Level 1	Level 2	Total
<b>Financial assets</b>			
<b>Trading securities</b>			
Externally managed funds	-	6	6
Debt securities	123	6	129
	<b>123</b>	<b>12</b>	<b>135</b>
<b>Non-trading securities</b>			
Available-for-Sale			
Debt securities	1,039	4,512	5,551
Equity securities	26	55	81
	<b>1,065</b>	<b>4,567</b>	<b>5,632</b>
<b>Loans and advances - available-for-sale</b>	-	89	89
<b>Derivatives held for trading</b>	-	94	94
<b>Financial liabilities</b>			
<b>Derivatives held for trading</b>	-	92	92
<b>Derivatives held as hedges</b>	-	30	30

**Financial instruments recorded at fair value**

The description of the determination of fair value for financial instruments recorded at fair value using valuation techniques is discussed in note 4, which incorporate the Group's estimate of assumptions that a market participant would make when valuing the instruments.

**Transfers between level 1 and level 2**

None of the financial instruments were transferred from level 1 to level 2 during the year ended 31 December 2009.

## 24 RISK MANAGEMENT

### **Introduction**

Risk is inherent in the Group's activities and is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. The Group is exposed to credit risk, liquidity risk, operational and market risk, legal risk and strategic risk as well as other forms of risk inherent in its financial operations.

Over the last few years the Group has invested heavily into developing a comprehensive and robust risk management infrastructure. This includes risk identification processes under credit, market and operational risk spectrums, risk measurement models and rating systems as well as a strong business process to monitor and control these risks.

### **Risk management structure**

Executive Management is responsible for implementing the Group's Risk Strategy/Appetite and Policy Guidelines set by the Board Risk Committee (BRC), including the identification and evaluation on a continuous basis of all significant risks to the business and the design and implementation of appropriate internal controls to minimise them. This is done through the following board committees, senior management committees and the Credit & Risk Group in Head Office.

Within the broader governance infrastructure, the board committees carry the main responsibility of best practice management and risk oversight. At this level, the BRC oversees the definition of risk appetite, risk tolerance standards, and risk process standards to be kept in place. The BRC is also responsible to coordinate with other board committees for monitoring compliance with the requirements of the regulatory authorities in the various countries in which the Group operates.

The Group Audit Committee is responsible to the Board for ensuring that the Group maintains an effective system of financial, accounting and risk management controls and for monitoring compliance with the requirements of the regulatory authorities in the various countries in which the Group operates.

The Group's Head Office Credit Committee (HOCC) is responsible for credit decisions at the higher levels of Group's lending portfolio, setting country and other high level Group limits, dealing with impaired assets and general credit policy matters.

Each subsidiary is responsible for managing its own risks and has its own Board Risk Committee, Credit Committee and (in the case of major subsidiaries) Asset and Liability Committee (ALCO), or equivalent, with responsibilities generally analogous to the Group committees.

The ALCO is chiefly responsible for defining long-term strategic plans and short-term tactical initiatives for directing asset and liability allocation prudently for the achievement of the Group's strategic goals. ALCO monitors the Group's liquidity and market risks and the Group's risk profile in the context of economic developments and market fluctuations, to ensure that the Group's ongoing activities are compatible with the risk/reward guidelines approved by the BRC. The above management structure, supported by teams of risk and credit analysts, as well as the IT systems provide a coherent infrastructure to carry credit and risk functions in a seamless manner.

The Operational Risk Management Committee (ORCO) is responsible for defining long-term strategic plans and short-term tactical initiatives for operational risk. It also has the overall responsibility to monitor and prudently manage exposure to operational risks including strategic and reputation risks.

**24 RISK MANAGEMENT (continued)**

**Risk measurement and reporting system**

**Risk mitigation**

As part of its overall risk management, the Group uses derivatives and other instruments to manage exposures resulting from changes in interest rates, foreign currencies, equity risks, credit risks, and exposures arising from forecast transactions.

The risk profile is assessed before entering into hedge transactions, which are authorised by the appropriate level of seniority within the Group. The effectiveness of hedges is monitored monthly by the Group. In situations of ineffectiveness, the Group will enter into a new hedge relationship to mitigate risk on a continuous basis.

The Group actively uses collateral to reduce its credit risk (see below for details).

**Excessive risk concentration**

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry or geographical location.

In order to avoid excessive concentrations of risk, the Group policies and procedures include specific guidelines to focus on country and counter party limits and maintaining a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly.

**Credit risk**

Credit risk is the risk that the Group will incur a loss because its customers, clients and counterparties failed to discharge their contractual obligations. The Group manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentration, and by monitoring exposures in relation to such limits.

The first level of protection against undue credit risk is through country, industry and other risk threshold limits, together with customer and customer group credit limits, set by the BRC and the HOCC and allocated between the Bank and its banking subsidiaries. Credit exposure to individual customers or customer groups is then controlled through a tiered hierarchy of delegated approval authorities based on the risk rating of the customer under the Group's internal credit rating system. Where unsecured facilities sought are considered to be beyond prudential limits, Group policies require collateral to mitigate the credit risk in the form of cash, securities, legal charges over the customer's assets or third-party guarantees. The Group also employs Risk Adjusted Return on Capital (RAROC) as a measure to evaluate the risk/reward relationship at the transaction approval stage. RAROC analysis is also conducted on a portfolio basis, aggregated for each business segment, business unit and for the whole Group.

**24 RISK MANAGEMENT (continued)**

**Maximum exposure to credit risk without taking account of any collateral and other credit enhancements**

The table below shows the maximum exposure to credit risk for the components of the balance sheet, including credit commitments and contingent items. The maximum exposure is shown gross, before the effect of mitigation through the use of master netting and collateral agreements.

	<i>Gross maximum exposure</i>	
	<b>2009</b>	<b>2008</b>
Liquid funds	<b>610</b>	704
Trading debt securities	<b>129</b>	81
Placement with banks and other financial institutions	<b>3,949</b>	4,017
Non-trading debt securities	<b>9,471</b>	10,543
Loans and advances	<b>10,949</b>	11,931
Other credit exposures	<b>590</b>	847
	<b>25,698</b>	28,123
Credit commitment and contingent items (note 21)	<b>8,794</b>	8,788
Total	<b>34,492</b>	36,911

Where financial instruments are recorded at fair value the amounts shown above represent the current credit risk exposure but not the maximum risk exposure that could arise in the future as a result of changes in values.

For more detail on the maximum exposure to credit risk for each class of financial instrument, references should be made to the specific notes. The effect of collateral and other risk mitigation techniques is shown below.

**Risk concentration of the maximum exposure to credit risk**

The Group's assets (before taking into account any collateral held or other credit enhancements), liabilities and equity and commitments and contingencies can be analysed by the following geographical regions:

	<i>Assets</i>		<i>Liabilities and equity</i>		<i>Credit commitment and contingent items</i>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
Western Europe	<b>4,077</b>	4,496	<b>2,020</b>	2,421	<b>1,746</b>	1,467
Arab World	<b>10,126</b>	11,833	<b>16,583</b>	17,833	<b>3,860</b>	4,800
Asia	<b>639</b>	691	<b>268</b>	363	<b>148</b>	135
North America	<b>6,248</b>	7,488	<b>3,609</b>	5,300	<b>1,015</b>	1,194
Latin America	<b>4,079</b>	2,990	<b>3,202</b>	2,142	<b>1,675</b>	674
Other	<b>529</b>	625	<b>16</b>	64	<b>350</b>	518
Total	<b>25,698</b>	28,123	<b>25,698</b>	28,123	<b>8,794</b>	8,788

**24 RISK MANAGEMENT (continued)**

**Risk concentration of the maximum exposure to credit risk (continued)**

An industry sector analysis of the Group's financial assets, before and after taking into account collateral held or other credit enhancements, is as follows:

	<i>Gross maximum exposure 2009</i>	<i>Net maximum exposure 2009</i>	<i>Gross maximum exposure 2008</i>	<i>Net maximum exposure 2008</i>
Financial services	9,712	8,620	11,601	9,077
Other services	3,790	3,433	3,760	3,570
Manufacturing	3,693	3,283	2,987	2,755
Construction	693	548	719	608
Mining and quarrying	468	457	297	289
Agriculture, fishing and forestry	300	300	151	151
Trade	269	206	454	339
Consumer	214	214	188	188
Government	6,231	6,214	7,483	7,465
Personal	328	158	483	357
Total	<b>25,698</b>	<b>23,433</b>	28,123	24,799

An industry sector analysis of the Group's credit commitments and contingent items, before and after taking into account collateral held or other credit enhancements, is as follows:

	<i>Gross maximum exposure 2009</i>	<i>Net maximum exposure 2009</i>	<i>Gross maximum exposure 2008</i>	<i>Net maximum exposure 2008</i>
Financial services	4,168	3,869	4,563	4,132
Other services	1,040	1,039	629	605
Manufacturing	1,983	1,961	2,176	2,162
Construction	795	793	572	571
Mining and quarrying	308	308	212	212
Agriculture, fishing and forestry	30	30	13	13
Trade	413	412	442	442
Government	34	34	166	164
Other	23	20	15	15
Total	<b>8,794</b>	<b>8,466</b>	8,788	8,316

**24 RISK MANAGEMENT (continued)**

**Credit quality per class of financial assets**

The credit quality of financial assets is managed by the Group using internal credit ratings. The table below shows the credit quality by class of financial asset, based on the Group's credit rating system.

31 December 2009	<i>Neither past due nor impaired</i>			<i>Past due</i>	<i>Total</i>
	<i>High grade</i>	<i>Standard grade</i>	<i>Sub-standard grade</i>	<i>or individually impaired</i>	
Liquid funds	610	-	-	-	610
Trading securities	129	-	-	-	129
Placements with banks and other financial institutions	2,948	994	7	-	3,949
Non-trading debt securities	8,358	1,090	-	23	9,471
Loans and advances	4,676	6,133	-	140	10,949
Other credit exposures	510	80	-	-	590
	<b>17,231</b>	<b>8,297</b>	<b>7</b>	<b>163</b>	<b>25,698</b>

31 December 2008	<i>Neither past due nor impaired</i>			<i>Past due</i>	<i>Total</i>
	<i>High grade</i>	<i>Standard grade</i>	<i>Sub-standard grade</i>	<i>or individually impaired</i>	
Liquid funds	704	-	-	-	704
Trading securities	81	-	-	-	81
Placements with banks and other financial institutions	2,983	1,027	7	-	4,017
Non-trading debt securities	9,758	719	-	66	10,543
Loans and advances	6,746	5,113	-	72	11,931
Other credit exposures	772	75	-	-	847
	<b>21,044</b>	<b>6,934</b>	<b>7</b>	<b>138</b>	<b>28,123</b>

As at 31 December 2009 and 2008, the total amount of past due but not impaired assets was immaterial.

It is the Group's policy to maintain accurate and consistent risk ratings across the credit portfolio through risk rating system. This facilitated focused management of the applicable risks and the comparison of credit exposures across all lines of business, geographic regions and products. The rating is supported by a variety of financial analytics, combined with the processed market information to provide the main inputs for the measurement of counterparty credit risk. All internal ratings are tailored to the various categories and are derived in accordance with Bank's credit policy. The attributable risk ratings are assessed and updated regularly. Each risk rating class has grades equivalent to Moody's, S&P and Fitch rating agencies.

**Carrying amount per class of financial assets whose terms have been renegotiated as at year end**

	<b>2009</b>	<b>2008</b>
Loans and advances	<b>59</b>	<b>48</b>

**24 RISK MANAGEMENT (continued)**

**Collateral and other credit enhancements**

The amount and type of collateral depends on an assessment of the credit risk of the counterparty. The types of collateral mainly includes cash and guarantees from banks.

Management monitors the market value of collateral, requests additional collateral in accordance with the underlying agreement, and monitors the market value of collateral obtained during its review of the adequacy of the allowance for impairment losses. The Group also makes use of master netting agreements with counterparties.

**Settlement risk**

Settlement risk is the risk of loss due to the failure of a counterparty to honour its obligations to deliver cash, securities or other assets as contractually agreed. For certain types of transactions, the Group mitigates this risk through a settlement agent to ensure that a trade is settled only when both parties fulfill their settlement obligations. Settlement approvals form a part of credit approval and limit monitoring procedure.

**Market risk**

Market risk is the risk that the Group's earnings or capital, or its ability to support business strategy, will be impacted by the change in market rates or prices related to interest rates, equity prices, credit spreads, foreign exchange rates, and commodity prices.

The Group has established risk management policies and limits within which exposure to market risk is monitored, measured and controlled by the Risk Management Department (RMD) with strategic oversight exercised by ALCO. The RMD's Market Risk Management (MRM) unit is responsible for developing and implementing market risk policy and risk measuring/monitoring methodology and for reviewing all new trading products and product limits prior to ALCO approval. MRM's core responsibility is to measure and report market risk against limits throughout the Group.

**Interest rate risk**

Interest rate risk arises from the possibility that changes in interest rates will affect future profitability or the fair values of financial instruments. The Group is exposed to interest rate risk as a result of mismatches of interest rate re-pricing of assets and liabilities. The most prominent market risk factor for the Group is interest rates. This risk is minimized as the Group rate sensitive assets and liabilities are mostly floating rate, where the duration risk is lower. In general, the Group uses matched currency funding and translates fixed rate instruments to floating rate to better manage the duration in the asset book.

The following table demonstrates the sensitivity to a reasonable possible change in interest rates, with all other variables held constant, of the Group's consolidated statement of income.

The sensitivity of the consolidated statement of income is the effect of the assumed changes in interest rates on the net interest income for one year, based on financial assets and financial liabilities held at 31 December 2009, including the effect of hedging instruments. The sensitivity of equity is calculated by revaluing fixed rate available-for-sale financial assets, including the effect of any associated hedges and swaps. Substantially all the available-for-sale non-trading securities held by the Group are floating rate assets. Hence, the sensitivity to changes in equity due to interest rate changes is insignificant.

	<i>Increase in basis points 2009</i>	<i>Sensitivity statement of income 2009</i>	<i>Decrease in basis points 2009</i>	<i>Sensitivity statement of income 2009</i>
<b>USD</b>	25	22	25	(22)
<b>Euro</b>	25	1	25	(1)
<b>GBP</b>	25	2	25	(2)
<b>BRL</b>	25	2	25	(2)
<b>Others</b>	25	3	25	(3)

**24 RISK MANAGEMENT (continued)**

*Interest rate risk (continued)*

*Currency risk*

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates.

The table below indicates the currencies to which the Group had significant exposure at 31 December 2009 on its monetary assets and liabilities and its forecast cash flows. The analysis calculates the effect of a reasonably possible movement of the currency rate against the US\$, with all other variables held constant on the consolidated statement of income (due to the fair value of currency sensitive trading and non-trading monetary assets and liabilities) and equity (due to the change in fair value of currency swaps and forward foreign exchange contracts used as cash flow hedges) and the effect of impact of foreign currency movements on the structured positions of the Bank in its subsidiaries. A negative amount in the table reflects a potential net reduction in the consolidated statement of income or equity, while a positive amount reflects a potential net increase.

Currency	<i>Change in currency rate in % 2009</i>	<i>Effect on profit before tax 2009</i>	<i>Effect on equity 2009</i>	<i>Change in currency rate in % 2008</i>	<i>Effect on profit before tax 2008</i>	<i>Effect on equity 2008</i>
Brazilian Real	+/- 5%	+/-1	+/-18	+/- 5%	-	+/-1
GBP	+/- 5%	+/-1	+/-9	+/- 5%	-	+/-3
Egyptian Pound	+/- 5%	-	+/-7	+/- 5%	-	+/-6
Jordanian Dinar	+/- 5%	-	+/-6	+/- 5%	-	+/-5
Algerian Dinar	+/- 5%	-	+/-6	+/- 5%	-	+/-2
Saudi Riyal	+/- 5%	-	-	+/- 5%	+/-8	-

*Equity price risk*

Equity price risk is the risk that the fair values of equities decrease as the result of changes in the levels of equity indices and the value of individual stocks. The non-trading equity price risk exposure arises from the Group's securities portfolio.

The effect on equity (as a result of a change in the fair value of trading equity instruments and equity instruments held as available for sale) due to a reasonably possible change in equity indices or the net asset values, with all other variables held constant, is as follows:

	<i>% Change in equity price 2009</i>	<i>Effect on statement of income/ equity 2009</i>	<i>% Change in equity price 2008</i>	<i>Effect on statement of income/ equity 2008</i>
<b>Trading securities</b>

Other equities	+/- 5%	-	+/- 5%	+/-1
<b>Available-for-sale equities</b>	+/- 5%	+/-4	+/- 5%	+/-4

**24 RISK MANAGEMENT (continued)**

**Operational risk**

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes or systems or from external events. Operational risk is inherent in all business activities and can never be eliminated entirely; however shareholder value can be preserved and enhanced by managing, mitigating and, in some cases, insuring against operational risk. To achieve this goal the Operational Risk Management Unit has developed an operational risk framework, which includes identification, measurement, management, and monitoring and risk control/mitigation elements. A variety of underlying processes are being deployed across the Group including risk and control self-assessments, Key Risk Indicators (KRI), event management, new product review and approval processes and business contingency plans.

The Group intends to make operational risk transparent throughout the enterprise, to which end processes are being developed to provide for regular reporting of relevant operational risk management information to business management, senior management, the ORCO, the BRC and the Board of Directors generally.

Group policy dictates that the operational functions of booking, recording and monitoring of transactions are carried out by staff that are independent of the individuals initiating the transactions. Each business line – including Operations, Information Technology, Human Resources, Legal & Compliance and Financial Control - is further responsible for employing the aforementioned framework processes and control programmes to manage its operational risk within the guidelines established by the Group's policy and procedures. To ensure that all operational risks to which the Group is exposed are adequately managed, support functions are also involved in the identification, measurement, management, monitoring and control/mitigation of operational risk, as appropriate.

**24 RISK MANAGEMENT (continued)****Liquidity risk**

Liquidity risk is the risk that the Group will be unable to meet its payment obligations when they fall due under normal and stress circumstances. To limit this risk, management has arranged diversified funding sources in addition to its core deposit base, manages assets with liquidity in mind, and monitors future cash flows and liquidity on a daily basis. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure additional funding if required.

The Group maintains liquid assets at prudential levels to ensure that cash can quickly be made available to honor all its obligations, even under adverse conditions. The Group is generally in a position of excess liquidity, its principal sources of liquidity being its deposit base, liquidity derived from its operations and inter-bank borrowings. The Minimum Liquidity Guideline (MLG) is used to manage and monitor daily liquidity. The MLG represents the minimum number of days the Group can survive the combined outflow of all deposits and contractual drawdowns, under market value driven encashability scenarios.

In addition, the internal liquidity/maturity profile is generated to summarize the actual liquidity gaps versus the revised gaps based on internal assumptions.

The table below summarises the maturity profile of the Group's financial liabilities at 31 December 2009 based on contractual undiscounted repayment obligations. See the previous table for the expected maturities of these liabilities. Repayments which are subjected to notice are treated as if notice were to be given immediately. However, the Group expects that many customers will not request repayment on the earliest date the Group could be required to pay and the table does not reflect the expected cash flows indicated by the Group's deposit retention history.

**25 OPERATING SEGMENTS**

For management purposes, the Group is organised into four operating segments which are based on business units and their activities. The Group has accordingly been structured to place its activities under the distinct divisions which are as follows:

- **Universal Banking** covers Retail and SME banking activities of the Group in the Arab World;
- **International Wholesale Banking** encompasses Project and Structured Finance, Trade Finance and Forfaiting, Islamic Financial Services, Corporate Banking & Financial Institutions, Syndications and Corporate Finance;
- **Treasury** comprises the activities of Treasury in Bahrain Head Office; and
- **Others** include activities of Banco ABC Brasil S.A and Arab Financial Services Company B.S.C. (c).

**25 OPERATING SEGMENTS (continued)**

**Geographical information**

The Group operates in six geographic markets: Middle East and North Africa, Western Europe, Asia, North America, Latin America and others. The following table show the external total operating income of the major units within the Group, based on the country of domicile of the entity for the years ended 31 December 2009 and 2008:

<i>2009</i>	<i>Bahrain</i>	<i>ABCIB</i>	<i>Banco ABC Brasil</i>	<i>Other</i>	<i>Total</i>
<i>Total operating income</i>	<u>145</u>	<u>100</u>	<u>194</u>	<u>202</u>	<u>641</u>
<i>2008</i>					
<i>Total operating income</i>	<u>147</u>	<u>110</u>	<u>217</u>	<u>133</u>	<u>607</u>

There were no revenues derived from transactions with a single external customer that amounted to 10% or more of the Group's revenue.

Non-current assets consist of premises and equipment and are not material to the Group.

**26 REPURCHASE AND RESALE AGREEMENTS**

Proceeds from assets sold under repurchase agreements at the year end amounted to US\$ 4,079 million (2008: US\$ 5,814 million). The carrying value of securities sold under repurchase agreements at the year end amounted to US\$ 4,358 million (2008: US\$ 6,756 million).

Amounts paid for assets purchased under resale agreements at the year end amounted to US\$ 64 million (2008: US\$ 271 million) and relate to customer product and treasury activities. The market value of the securities purchased under resale agreements at the year end amounted to US\$ 64 million (2008: US\$ 272 million).

**27 TRANSACTIONS WITH RELATED PARTIES**

Related parties represent major shareholders, associates, directors and key management personnel of the Group and entities controlled, jointly controlled or significantly influenced by such parties. Pricing policies and terms of these transactions are approved by the Group's management.

The year end balances in respect of related parties included in the consolidated financial statements are as follows:

	<i>Major shareholders</i>	<i>Directors</i>	<b>2009</b>	2008
Deposits from customers	<b>1,535</b>	<b>1</b>	<b>1,536</b>	1,883

The expenses in respect of related parties included in the consolidated financial statements are as follows:

Interest expense	<b>3</b>	9
------------------	----------	---

Compensation of the key management personnel is as follows:

	<b>2009</b>	2008
Short term employee benefits	<b>13</b>	18
Post employment benefits	<b>8</b>	10
	<b>21</b>	28

**28 FIDUCIARY ASSETS**

Funds under management at the year end amounted to US\$ 10,103 million (2008: US\$ 5,324 million). These assets are held in a fiduciary capacity and are not included in the consolidated statement of financial position.

**29 ISLAMIC DEPOSITS AND ASSETS**

Deposits from customers and banks and financial institutions include Islamic deposits of US\$ 741 million (2008: US\$ 652 million). Loans and advances and non-trading securities include Islamic assets of US\$ 894 million (2008: US\$ 1,091 million) and US\$ 401 million (2008: US\$ 368 million).

**30 ASSETS PLEDGED AS SECURITY**

At the statement of financial position date, in addition to the items mentioned in note 26, assets amounting to US\$ 266 million (2008: US\$ 313 million) have been pledged as security for borrowings and other banking operations.

**31 BASIC AND DILUTED EARNINGS (LOSS) PER SHARE**

Basic earnings (loss) per share is calculated by dividing the profit (loss) for the year by the weighted average number of shares during the year. No figures for diluted earnings per share have been presented, as the Bank has not issued any capital based instruments which would have any impact on earnings (loss) per share, when exercised.

The Group's earnings (loss) for the year are as follows:

	<b>2009</b>	2008
Profit (loss) for the year	<b>122</b>	(880)
Weighted average number of shares outstanding during the year (millions)	<b>2,000</b>	1,538
Basic and diluted earnings (loss) per share (US\$)	<b>0.06</b>	(0.57)

**32 CAPITAL ADEQUACY**

The primary objectives of the Group's capital management are to ensure that the Group complies with externally imposed capital requirements and that the Group maintains strong credit ratings and healthy capital ratios in order to support its business and to maximise shareholders' value.

The Group manages its capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividend payment to shareholders, return capital to shareholders or issue capital securities. No changes were made in the objectives, policies and processes from the previous years.

The risk asset ratio calculations as at 31 December are based on standardised measurement methodology and in accordance with the CBB Basel II guidelines.

		<b>Basel II</b>	
		<b>2009</b>	<b>2008</b>
<b>CAPITAL BASE</b>			
Tier 1 capital		<b>2,664</b>	2,509
Tier 2 capital		<b>683</b>	650
Total capital base	[a]	<b>3,347</b>	3,159
<b>RISK WEIGHTED EXPOSURES</b>			
Credit risk weighted assets and off balance sheet items		<b>17,164</b>	17,625
Market risk weighted assets and off balance sheet items		<b>1,511</b>	882
Operational risk weighted assets		<b>1,188</b>	1,030
Total risk weighted assets	[b]	<b>19,863</b>	19,537
Risk asset ratio	[a/b*100]	<b>16.9%</b>	16.2%
Minimum requirement		<b>12.0%</b>	12.0%

Regulatory capital consists of Tier 1 capital, which comprises share capital, retained earnings, statutory reserve, general reserve, minority interests, foreign currency translation adjustments in equity and Tier 2 capital, which includes subordinated long term debt and collective provisions.

The Group has complied with all the requirements as set by the Central Bank of Bahrain.
